**Answer** The conclusion of the argument is that violent video games should be banned The premise is that they desensitize young people to violence and lead to increased aggression However this argument relies on several assumptions Firstly it assumes a direct causal link between playing violent video games and increased aggression which requires further evidence Studies showing a correlation dont necessarily prove causation Other factors like societal influences and individual predispositions are not considered Secondly it assumes that banning video games will effectively reduce violence ignoring the possibility that other forms of violent entertainment might exist Therefore the argument is weak due to its reliance on unproven assumptions and its failure to address alternative explanations
