during the past several years the world has entered the first phase of the internet  
revolution investors showed confidence and faith in the prospects of the internet  
driven economy in the us alone some 30 000 dot com companies have sprung up to

support electronic commerce with a wide variety of business models technologies and or items or services to sell or even give away traditional businesses so called brick and mortar or offline businesses have started to respond to challenges by internet based new competitors by augmenting their own businesses with internet based or online businesses and or filing lawsuits against them the initial business to consumer orientation of electronic commerce is giving way to business to business commerce with large corporations forming electronic exchanges or consortia to conduct commerce among members government industry and civic groups have started addressing social issues related to the internet such as taxation on electronic commerce privacy intellectual property rights security hacking cyber crimes digital divide etc governments have started legitimizing electronic signatures and stepping up efforts to track down perpetrators of cyber crimes the courts have started to wrestle with issues of privacy intellectual property rights crimes and impediments to internet driven economy

the book presents a comprehensive study of various cognitive and affective aspects of web searching for translation problem solving research into the use of the web as an external aid of consultation has frequently occupied a secondary position in the investigation of translation processes the book aims to bridge this gap in the literature beginning with a detailed survey of previous studies of these processes it then focuses on web search behaviors using qualitative and quantitative analysis that presents a multifaceted overview of translation oriented web searching the book concludes by addressing the implications for the teaching of and research into translators web searching skills with regard to teaching the book s didactic discussions will make it a valuable tool for both translator trainers and translation students wanting to familiarize themselves with the intricacies of searching and to reflect upon the pedagogical implications of the study for acquiring online information literacy in translator training

each year disasters such as storms floods fires volcanoes earthquakes and epidemics cause thousands of casualties and tremendous damage to property around the world displacing tens of thousands of people from their homes and destroying their livelihoods the majority of these casualties and property loss could be prevented if

better information were available regarding the onset and course of such disasters several remote sensing technologies such as meteorological and earth observation satellites communication satellites and satellite based positioning supported by geoinformation technologies offer the potential to contribute to improved prediction and monitoring of potential hazards risk mitigation and disaster management which in turn would lead to sharp reductions in losses to life and property this book explores most of the scientific issues related to spatially supported disaster management and its integration with geographical information system technologies in different disaster examples and scales dealing with disasters over space and time represents a long lasting theme now approached by means of innovative techniques and modelling approaches several priorities for actions are outlined toward preventing new and reduce existing disaster risks including understanding disaster risk strengthening disaster risk governance for management of disaster risk investing in disaster reduction for resilience and enhancing disaster preparedness for effective response this book presents ideas to address the challenges facing different components of spatial patterns related to ecological processes and the published articles extended versions of selected presentations from the gi4dm conference in 2019 in prague

traditional approaches to understand space tend to view public space mainly as a shell or container focussing on its morphological structures and functional uses that way its ever changing meanings contested or challenged uses have been largely ignored as well as the contextual and on going dynamics between social actors their cultures and struggles the key role of space in enabling spatial opportunities for social action the fluidity of its social meaning and the changing degree of publicness of a space remain unexplored fields of academic inquiry and professional practice public space and relational perspectives offers a different understanding of public spaces in the city the aim of the book is to re introduce the lived experiences in public life into the teaching curricula of those academic disciplines which deal with public space and the built environment such as architecture planning and urban design as well as the social sciences the book presents conceptual practical and research challenges and brings together findings from activists practitioners and theorists the editors provide eight educational challenges that educators can endorse when training future practitioners and researchers to accept and to engage with the social relations that unfold in and through public space cover image karo
